**A.1 NSSC Early Tech Refresh – NSSC:** The purpose of this Infrastructure Upgrade Proposal (IUP) is to provide a price quote to the NASA Shared Services Center (NSSC) for the list of 44 devices provided by NASA on June 27, 2012. The price in this IUP will be the final one-time lump sum to complete the requirement for an Early Tech Refresh (ETR) of the compute devices. The refreshes are important for NASA users to comply with applicable Federal mandates. HPES will take the listed former ODIN equipment out of service upon refresh and shall have no further obligation to support the devices. The listed devices are being refreshed with ACES seats.

**A. SERVICES** – Provide a qualified support resource to deliver the requested dedicated services.

- HPES will perform the ETRs in accordance with the requirements provided by NASA in its request dated June 27, 2012. HPES is proposing a one-time lump sum purchase price for buyout of the equipment listed in the request for IUP which is attached as *Appendix A – Equipment List*.
- HPES will perform the refresh with an ACES compute seat. Upon receipt of the contract modification that accepts this IUP, HPES will coordinate the invoicing for the equipment buyout.

**B. PRICING -**

The methodology stated in the ACES contract PWS Section 3.16 was used to arrive at the buyout prices for the equipment.

*The Contractor shall invoice the remainder of the Asset Transition Value (ATV) for the existing seat's hardware platform at the time of the request*  
 HPES calculated the remaining value of the ODIN equipment taken out of service using the ATV of the asset at the time of the May 2012 refresh.

**C. BILLING SCHEDULE –**

| Items              | Number of Equipment Items | Lump Sum Purchase Price |
|--------------------|---------------------------|-------------------------|
| Listed on Appendix | 44                        | ██████████              |

The proposed buyout approach for the assets will be a one-time lump sum purchase price of ██████████ for the 44 equipment line items noted in NASA's listing provided as Appendix A.

**D. Assumptions –**

- HPES understands that the provided list is a partial list of ETRs at NSSC through May 2012, and that a second NASA request for IUP will cover ETRs at NSSC for any additional devices performed in June 2012. HPES' response to future requests for ETRs of additional devices will be in addition to this response.

**A.2 JSC Software and Support Purchase:** The purpose of this Infrastructure Upgrade Proposal (IUP) is to provide software and support to JSC in accordance with the IUP requirements provided by NASA on February 2, 2012. The HPES proposal describes the approach and pricing to provide the requested software and support services. Version 2.0 of this proposal follows the approach and pricing presented in Version 1.0 on February 20, 2012, and accepted by Contract Modification #45 dated April 3, 2012. Specifically, Version 2.0 makes one change to the software products requested, ██████████  
 ██████████

**B. SERVICES –** Provide a qualified support resource to deliver the requested dedicated services.

- HPES has reviewed the operational support requirements described in the IUP request in NASA's email communication of February 2, 2012, which is referenced as part of this response, and will provide and support the requested software.
- ██████████
- HPES will provide the licenses in the quantities specified, software assurance, installation, and ongoing monthly support as described in this proposal. In order to perform the requested software updates, HPES will package the software to enable support management for ACES seats. HPES will provide the following product quantities:
  - 50 volume license of the current version of Microsoft Project Standard at the time of the SR (currently: Version 2010)

- 50 Volume license of the current version [REDACTED] the SR (currently: Version 10)
- 25 volume license of the current version [REDACTED] of the SR (currently: Version 2010)

**Service Levels-** In order to keep the software support service levels covered by this IUP consistent with the ACES contract terms, the HPES support for the IUP software support services proposed herein will be as noted in the following responses to the IUP requirements.

- 1) Install on ACES seats as directed by an SR
  - Each application will be packaged for electronic distribution. Packaging will include sand box testing, development testing, integration testing, and incorporation of any policy changes needed to deliver the application to specific machines. HPES will ready the application for distribution to the machine by associating the users to a group in Active Directory.
- 2) Automatically reinstall the application if ACES performs a box swap, refresh, seat change, hard drive replacement, wipe and load, etc. The reinstall should include any change Performed by ACES as a result of either a trouble ticket or an SR. The application should only be removed if specifically directed to do so by an SR.
  - Should NASA require replacement of the seat or hard drive, packaging of the application will enable automatic reinstallation of the application. HPES will not remove an application unless a specific service request is received.
- 3) Normal software updates need to be installed within two weeks of release by the vendor.
  - HPES will apply software updates within the timeframe aligned with the SLA metrics for software certification and updates defined in the ACES contract in SLA metric (SD-26). The metric standard for SD-26 ties the time to install all commercially released updates/upgrades and patches to a scheduled date after Agency ACES CCB approval.
- 4) Critical security updates need to be installed within two days of release by the vendor
  - Normal and Critical security updates will be tested and validated for client device installation within SLA standards that are current in place for SLA #SMS-4 which includes a target of Critical Patch installations within 30 days after patch release, and SLA #SMS-5 which includes a target of Expedited Patch installations within 7 days of release by the vendor. Critical Updates requiring zero day exploits will be handled within the Incident Response process and coordinated with NASA SOC / and local Center CISO.
- 5) Provide software assurance
- 6) Updates to the newer versions of an application shall be performed within four weeks of release by the vendor
  - For the products proposed herein, HPES will provide software assurance services to allow for implementation of updates to new

versions of the requested Microsoft and Adobe applications as they are released. Software license maintenance (patches) and support are also included. HPES will apply version updates in a timeframe aligned with the SLA metric (SD-26) for software certification and updates defined in the ACES contract. The metric standard for SD-26 ties the time to install all commercially released updates/upgrades and patches to a scheduled date after Agency ACES CCB approval.

**B. PRICING -**

The components of the JSC Software and Support Purchase are:

1. One-time charge for Application Packaging (per application)
2. One-time charge for the Software License
3. One-time charge for Distribution of the software
4. Monthly charge for Software Assurance over the POP
5. Application Re-packaging charge (as needed, or as a monthly charge)

**C. BILLING SCHEDULE –**

**1. Application Packaging**

In order to perform automatic software updates, HPES must prepare the software for use in the ACES environment, which includes testing and incorporation of any policy changes needed to deliver the application to specific machines. This is performed once per application until new versions must be incorporated, in which case Re-packaging must be performed (see item 5 below). Pricing for the labor is provided using the ACES Contract Attachment I-10: Schedule of Fully Burdened Labor Rates, for the applicable contract year (CY1) using the labor category – Subject Matter Expert (SME).

*Application Packaging – One-time Fixed Price per Application*

| Item                               | Hours | SME Labor Rate | Total Price per Application |
|------------------------------------|-------|----------------|-----------------------------|
| MS Project Standard                | █     | █              | █                           |
| Adobe Acrobat Pro                  | █     | █              | █                           |
| MS Visio Standard                  | █     | █              | █                           |
| Total Price of Labor for Packaging |       |                | █                           |

**2. Software Licenses**

HPES' pricing for the licenses is applicable to the requested lots being ordered under this IUP.

*Software Licenses – One-Time Charge*

| Software                          | Price per License | No. of Licenses | Total Price |
|-----------------------------------|-------------------|-----------------|-------------|
| MS Project Standard               | ██████            | █               | ██████      |
| Adobe Acrobat Pro                 | ██████            | █               | ██████      |
| MS Visio Standard                 | ██████            | █               | ██████      |
| Total Price for Software Licenses |                   |                 | ██████      |

**3. Distribution**

HPES must ready the application for distribution to each specific machine by associating the users to a group in Active Directory. This will involve ██████ effort from a resource ██████ category, per license.

*Software Distribution – One-Time Charge*

| Software                              | Hours per License | Rate   | No. of Licenses | Total Price |
|---------------------------------------|-------------------|--------|-----------------|-------------|
| MS Project Standard                   | █                 | ██████ | █               | ██████      |
| Adobe Acrobat Pro                     | █                 | ██████ | █               | ██████      |
| MS Visio Standard                     | █                 | ██████ | █               | ██████      |
| Total Price for Software Distribution |                   |        |                 | ██████      |

**4. Software Assurance**

HPES will provide software assurance for the period of performance as shown in the table below.

*Software Assurance – Monthly Charge*

| Software                              | Monthly Unit Price | No. of Licenses | Total Price |
|---------------------------------------|--------------------|-----------------|-------------|
| MS Project Standard                   | ██████             | █               | ██████      |
| Adobe Acrobat Pro                     | ██████             | █               | ██████      |
| MS Visio Standard                     | ██████             | █               | ██████      |
| Monthly Charge for Software Assurance |                    |                 | ██████      |
| Software Assurance for the POP        |                    |                 | ██████      |

\*HPES anticipates that software will be distributed in August 2012 which would correlate [REDACTED] payments (CY1, 3 payments; CY2, CY3, CY4, 36 payments). Should the start of monthly software assurance charges begin later than June, it would reduce the number of payments and increase the monthly charge accordingly.

The one time price for Application Packaging, Software Licenses, and Software Distribution is [REDACTED]

The monthly price for Software Assurance [REDACTED] for the period of performance August 1, 2012 to October 31, 2015 (39 monthly payments), for a total [REDACTED]

The total price (excluding re-packaging) [REDACTED].
