

October 2010

NASA Awards Contract Modification for Shared Services Center

NASA has awarded Computer Sciences Corporation (CSC) of Falls Church, Va., a modification to exercise the first option year under its existing contract. This is a one-year option period for the continuation of financial management, human resources, procurement and information technology support services to NASA.

The one-year option increases the existing NASA Shared Services Center support contract by more than \$38 million and provides services through Sept. 30, 2011.

The center is a partnership among NASA, CSC, and the states of Mississippi and Louisiana. The center performs selected business activities for all 10 NASA centers.
