Individual Development Planning (IDP) Overview for Learners

DATE
Course Objectives

At the end of this course, you will be able to:

– Describe the steps in the IDP process
– Formulate goals and development activities
– Use IDP functionality in SATERN to:
  • Create your IDP
  • Create short-, mid-, and long-range goals
  • Add activities to support your development goals
  • Revise and edit your IDP
  • Submit an IDP for approval
  • Update your IDP as activities are completed
Course Agenda

Introduction

– Module 1: IDP Overview
– Module 2: Prepare for Your IDP
– Module 3: Create Your IDP
– Module 4: Finalize Your IDP
– Module 5: Manage Your IDP

Summary
Module 1

IDP Overview
What Is an Individual Development Plan (IDP)?

• An IDP is a collection of goals, objectives, and activities for a specific employee.
• It is developed collaboratively between you and your supervisor.
• The IDP reflects the development needs for your current position as well as your future development needs.
• It identifies training and other developmental experiences needed to achieve both personal and Agency goals within a specific timeframe.
What Is an IDP? (cont.)

An IDP is:

- An official planning document used to capture your training and development activities as a NASA employee
- A tool to help you and your supervisor communicate about developmental needs
- An opportunity to learn where your skills fit into NASA’s current and future workforce needs
- Available to all NASA civil service employees

An IDP is NOT:

- Set in stone; it is a working document which should change as needs and priorities change
- A contract between you and NASA for training or a guarantee of advancement
- A performance management tool. Completion of activities on the IDP is not a factor in the performance process management
- Available to NASA contractors
Why NASA Implemented the IDP in SATERN?

• The Agency is committed to continuous learning that enables the NASA workforce to achieve mission success.
• The use of a standard IDP form and process across the Agency improves consistency and eliminates redundant processes.
• The SATERN IDP offers real-time information through automatic integration with the learning management system.
• Efficiency is improved through electronic routing of review and approvals to coaches and supervisors.

NASA policy (NPD 3410.2F) supports the enhancement of employee skills and the importance of employee development.
Who is Involved in the Process?

Your supervisor is responsible for:

• Working with you to evaluate skill gaps and development needs
• Helping you to identify training resources and developmental activities
• Meeting with you to discuss draft IDPs
• Providing feedback on the IDPs
• Approving your IDP and supporting your training and development

Supervisor-employee communication is key to the success of the IDP process.
Who is Involved in the Process? (cont.)

If you have a **Coach or Mentor:**

- Coaching and mentoring programs at NASA can help to improve your capabilities.
- The selection of a coach or mentor is optional and may not be applicable to you.
- If you select a Coach in your Personal Profile, he/she will be able to view your IDP in SATERN at any point.
- It is your responsibility to request an IDP review by your coach or mentor.
- Coaches and mentors can offer comments on the IDP, but cannot approve or activate the IDP in SATERN.
IDP Process Phases

1. Prepare
   - Assess skill needs
   - Formulate goals
   - Identify development activities
   - Create draft IDP in SATERN

2. Create
   - 30 days prior to supervisor/employee meeting
   - Within 30 days of supervisor/employee meeting

3. Finalize
   - Review IDP
   - Submit IDP
   - Revise IDP
   - Approve IDP

4. Manage
   - Follow up midyear
   - Track progress in SATERN
   - Begin development activities

30 days prior to supervisor/employee meeting
